

Reasoning

- 1. Direction:** Study the information carefully and answer the following questions.
Eight people i.e. A, B, C, D, E, F, G and H sit a square-shaped table. Four people sit at the four corners of the table and face outside the table. Four people sit in the middle of the four sides and face inside the table. H sits to the immediate right of A. One person sits between H and B who does not sit adjacent to A. C sits third to the right of G. G does not sit adjacent to B. Two people sit between G and D. E neither sits adjacent to C nor sits at the corner of the table.
- 2.** Eight people are sitting around a rectangular table. Three of them are sitting on each long side and one of them is sitting on each short side of the table. Some of them are facing inside and some are facing outside the table.
T sits second to the right of N and both sit on the same side of the table. Three people sit between T and W, who face the opposite direction of N and Z. J sits third to the right of W and faces the opposite direction of the one, who sits opposite him. S sits on the shorter side of the table. V sits third to the right of S, who faces inside. Z is not a neighbor of V and sits fourth to the right of M, who faces the opposite directions of its neighbors. V and T face opposite
- 3.** Six people are sitting around a rectangular table. Two of them are sitting on each longer side and one of them is sitting on each shorter side of the table. Some of them are facing inside and some are facing outside the table.
F sits third to the right of P, who is not sitting at the shorter side of the table. P faces outside. One person sits between F and K and both face the opposite directions. K is not sitting immediate right of P. J sits second to the left of K. The one, who sits opposite J, is not facing outside. Q is not sitting opposite P. S and Q face the same direction. F and J face opposite directions.
- 4. Direction:** Study the following data carefully and answer the questions accordingly.
Eight people are sitting around a square table. Four of them are sitting at the corners facing inside, and the remaining four are sitting at the sides of the table facing outside.
M sits at the corner. Two people sit between H, and M. W sits immediate right of H, who is not a neighbour of O. J sits third to the right of W. O is a neighbour of J. P sits second to the right of F. Y is not a neighbor of F.
- 5. Direction:** Study the information carefully and answer the following questions.
Eight people i.e., P, Q, R, S, T, U, V, and W sit in a square-shaped table. Four people sit at the four corners of the table and face outside the table. Four people sit at the middle of the four sides and face inside the table. P sits second to the left of R. One person sits between R and T. S sits third to the left of W who sits at the corner. Q sits second to the left of V who sits adjacent to T. U sits at the corner of the table.

- 6. Direction:** Study the following data carefully and answer the questions accordingly.
Eight people are sitting around a square table. Four of them are sitting at the corners facing outside and the remaining four are sitting at the sides of the table facing inside. One person sits between S and M. M does not sit at the corner and is not a neighbor of V. Two people sit between V and S. T sits second to the right of V. Two people sit between Q and T. One person sits between Q and F. S is not a neighbor of N. R sits third to the left of F, who does not sit at the corner.
- 7. Direction:** Study the information carefully and answer the following questions.
Eight people i.e. A, B, C, D, E, F, G and H sit in a square shaped table. Four people sit at the four corners of the table and face outside the table. Four people sit at the middle of the four sides and face inside the table. Only one person sits between G and D. D sits at one of the sides of the table. C sits third to the right of D. One person sits between C and A who does not sit adjacent to G. The one who sits second to the right of H sits adjacent to C. B sits second to the right of E
- 8. Direction:** Study the following data carefully and answer the questions accordingly.
Eight people are sitting around a square table. Four of them are sitting at the corners facing inside, and the remaining four are sitting at the sides of the table facing outside.
M sits at the corner. Two people sit between H, and M. W sits immediate right of H, who is not a neighbour of O. J sits third to the right of W. O is a neighbour of J. P sits second to the right of R. Y is not a neighbour of F.
- 9.** Eight people i.e. A, B, C, D, E, F, G and H sit in a square shaped table. Four people sit at the four corners of the table and are facing inside the table. Four people sit at the middle of the four sides and are facing outside the table. A sits opposite to B. D sits at one of the sides of the table. G sits third to the right of E. G does not sit adjacent to A and C F sits third to the right of D. H sits second to the right of G. E sits at the corner of the table.
- 10.Direction:** Study the information carefully and answer the following questions.
Eight people i.e. A, B, C, D, E, F, G, and H sit at a square-shaped table. Four people sit at the four corners of the table and face outside the table. Four people sit in the middle of the four sides and face inside the table.
H sits third to the right of B. Two people sit between B and A. C sits second to the right of D. Three people sit between D and F. E sits second to the right of G who sits at the corner.
- 11.** Eight people i.e. P, Q, R, S, T, U, V, and W sit in a square-shaped table. Four people sit at the four corners of the table and face outside the table. Four people sit in the middle of the four sides and face inside the table. P sits third to the right of U. and Q. T sits second to the left of Q. Number of people sitting between T and U is the same as the number of people sitting between Q and V. R sits second to the right of the one who sits opposite to W. R does not sit adjacent to V. S does not sit at the side of the table.
