

Reasoning

- 1- Fourteen people are sitting in two rows. In Row 1- P, Q, R, S, T, U and V are sitting facing the south direction and in Row 2- A, B, C, D, E, F and G are sitting facing the north direction but not necessarily in the same order.
B sits third to the right of D. Two people sit between Q and the one who faces B. Three people sit between Q and V. The one who faces V sits adjacent to A. Two people sit between A and C. Three people sit between P and the one who faces C. F sits to the immediate left of the one who faces S. Three people sit between S and T. G does not face T. R does not face B.
- 2- Twelve people are sitting in two parallel rows. A, B, C, D, E, F are sitting in row - 1 and facing south and P, Q, R, S, T, U are sitting in row - 2 and facing north such that the people sitting in row - 1 are sitting opposite to the people sitting in row - 2. All the information is not necessarily in the same order.
Two people sit between B and E. B sits at the extreme end. P sits second to the right of the one who faces E. Three people sit between P and U. Two people sit between A and the one who faces U. F sits third to the right of the one who faces Q. R sits second to the left of the one who faces C. S sits at the extreme end of the row. C does not sit at the extreme end.
- 3- Ten people are sitting in two parallel rows. A, B, C, D, E are sitting in Row- 1 and facing south and P, Q, R, S, T are sitting in Row - 2 and facing north such that the people sitting in Row - 1 are sitting opposite to the people sitting in Row- 2. All the information is not necessarily in the same order.
A sits third to the right of C. The one who faces C sits adjacent to T. Two people sit between T and P. R sits second to the right of the one who faces B. B does not sit at the end of the row. Q neither faces A nor B. D does not sit at the end.
- 4- Eight people are sitting in two parallel rows having four people each in such a way that there is equal distance between adjacent persons. In row- I, A, B, C and D are seated and all of them are facing north. In row - II, L, M, N and O are seated and all of them are facing south but not necessarily in the same order. Therefore, in the given seating arrangement each member seated in a row faces another member of the other row.
Only one person sits to the left of A. L faces the one who sits to the immediate right of A. One person sits between L and M. M faces the one who sits second to the left of C. N sits second to the left of O. O sits adjacent to the one who faces B.
- 5- There are fifteen persons i.e. A, B, C, D, E, F, G, H, I, J, K, L, M, N, O sitting in three parallel rows, five in each row, all facing north. Row 1 is to the north of Row 2 and Row 2 is to the north of Row 3. All the persons of the three rows are sitting opposite to each other.
G sits third to the right of the one who sits second to the left of the one who sits opposite to G. G sits third from the left end in row 2. I and J don't sit in the same row. One person sits

between the one who sits opposite to D and M who doesn't sit at the right end. H sits to the immediate right of M who sits opposite to K. K doesn't sit to the immediate right of C. C doesn't sit in row 2 and no one sits to the west of C. One person sits between L and the one who sits opposite to K. A sits in the middle row but neither adjacent to K nor D. N sits opposite to A but not doesn't sit adjacent to L. O sits to the immediate left of L and sits opposite to B. E sits second to the right of O but doesn't sit to the north of N. I sits to the north-west of F.

- 6- Ten people are sitting in two rows such that S, D, V, G and T are sitting in Row-1 and facing North, and Y, E, Z, W and K are sitting in Row - 2 and facing South. The people in row 1 are facing the people who sit in row 2.

T sits second to the left of the one who faces K. One person sits between K and W. W and E sit together. The one who faces E, sits to the immediate left of S. One Person sits between G and S. The one who faces T, sits immediate right of the one who faces D. Not more than one person sits between K and Z. The one who faces Z does not sit to the right of S. Y does not face the one who sits second to the left of G.

- 7- Ten people are sitting in two rows such that C, T, S, P and W are Sitting in row 1 and facing South, and L, M, D, Z and H are sitting in row 2 and facing North. Each row consists of six seats. The people (seat) in row 1 are facing the people (seat) who sit in row 2.

There are two seats between H and the one who faces the one who sits to the immediate right of W. S sits second to the right of W. M sits diagonally opposite to the who faces the one who sits second to the left of D. M sits at the extreme end. D faces W who is an immediate neighbor of T. One person sits between T and C. Z is an immediate neighbor of D but Z does not face C and T. L sits second to the left of D. No one sits between S and T.
